

COURSE OVERVIEW

Programme Overview

This lower secondary course is designed to build a strong foundation in English, Mathematics, Science, and Humanities, preparing students for upper secondary studies in the IGCSE and the O-Level programme.

Academic Development

Students will develop academic essay writing skills and broaden their vocabulary to support research, examinations, and other subjects taught in English.

Holistic Education

The course offers a well-rounded and balanced education, equipping your child with the skills and confidence to succeed in their Year 7 studies and beyond.

OBJECTIVES

1

Gain familiarity with the Cambridge Lower Secondary curriculum and the assessment objectives for the subjects covered.

2

Develop a clear understanding of, and acquire, the knowledge and skills outlined in the assessment objectives for each respective Cambridge Lower Secondary subject.

3

Read, write, speak, and listen to communicate clearly and confidently across all subjects taught in English.

COURSE STRUCTURE

Students enrolled into this course **MUST** do the following subjects:

English Language

Chinese Language

Mathematics

Computing
