

## COURSE OVERVIEW

### Programme Overview

This lower secondary course is designed to build a strong foundation in English, Mathematics, Science, and Humanities, preparing students for upper secondary studies in the IGCSE and the O-Level programme.

### Academic Development

Students will develop academic essay writing skills and broaden their vocabulary to support research, examinations, and other subjects taught in English.

### Holistic Education

The course offers a well-rounded and balanced education, equipping your child with the skills and confidence to succeed in their Year 8 studies and beyond.

## OBJECTIVES

1

Develop a clear understanding of, and acquire, the knowledge and skills outlined in the assessment objectives for each respective Cambridge Lower Secondary subject.

2

Build core knowledge and understanding in subjects such as English, Mathematics, Science, and Global Perspectives, preparing them for programmes like Cambridge IGCSE or the GCE 'O' Level course in Year 9.

3

Analyse information, evaluate ideas, and apply reasoning—skills that are essential for academic success and real-world situations.

## COURSE STRUCTURE

Students enrolled into this course **MUST** do the following subjects:

English Language

Chinese Language

Mathematics

Computing

Global Perspectives

STEM
